

# Hotmath.com

## Math homework problems explained!

The screenshot shows the Hotmath.com interface. On the left, there are several textbook covers: Geometry, Math, Precalculus, Algebra 2, Algebra 1, Trigonometry, and Calculus. A purple banner across the covers says "Over 150 textbooks supported". On the right, there is a preview of a textbook page with a problem and its solution. A pink circle highlights a specific problem, and another pink circle highlights a yellow button at the bottom right of the page. Below the screenshot, there are three numbered steps: 1. Select your textbook, 2. Pick page & problem, and 3. View the hints, steps, and answer.

- 1 Select your textbook
- 2 Pick page & problem
- 3 View the hints, steps, and answer

Doing assigned homework is required for success in math courses.

We know that almost every student struggles with math homework from time to time, and a parent or tutor is not always available to help.

Hotmath.com is an Internet service that explains homework problems from textbooks, so students can immediately see how to get the answers.

We have a license for your child to use Hotmath for a period of time at no cost to you. Simply go to the website and use this password:
